Shri Mahaveer College

(Affiliated to the University of Rajasthan)
A Co-educational English Medium PG College

BBA I YEAR

BUSINESS COMMUNICATION

After completion of course:

CO1	Understand and demonstrate the use of basic and advanced proper writing techniques that today's technology demands, including audience reaction.
CO2	Write effective and concise letters and memos,
CO3	Prepare informal informal and formal reports, Proofread and edit copies s of business correspondence.
CO4	Plan successfully for and participate in meetings and conduct proper techniques in telephone usage. Use e-mail effectively and efficiently

BUSINESS & MANAGEMENT

After completion of course:

CO1	Defining management and managerial activities that contribute to managerial effectiveness.
CO2	Explain the conceptual knowledge about planning and decision making using the techniques of coordination.
CO3	Apply and identify the suitable leadership style and states role of motivating people at work.
CO4	Analyze and evaluate the techniques of controlling and smooth implication of change in the organization.

LEGAL ASPECTS OF INDIAN BUSINESS

After completion of course:

CO1	To explore the global legal environment in which business operates.
CO2	To address current issues in the law of agency, indemnity and guarantee contracts and assess the impact of these laws on business.
CO3	Knowledge of special provisions of the Indian Contract Act.
CO4	Legal perspective of the method of payment in business transactions

Shri Mahaveer College

(Affiliated to the University of Rajasthan)
A Co-educational English Medium PG College

BUSINESS ECONOMICS

After completion of course:

CO1	Defining the term business economics, Different types of Markets (Perfect competition, Monopoly, Monopolistic and oligopoly competition), determination of factor pricing
CO2	To understand the production function (Supply, Laws, Returns to scale & Expansion Path)
CO3	Apply an ethical understanding and perspective to business situations
CO4	To analyze and Evaluate the Consumer Behavior (Demand and elasticity of demand, Cardinal, Ordinal and Consumer Surplus) Cost and Revenue, National Income and economic welfare

FINANCIAL ACCOUNTING

After completion of course:

CO1	To define financial management, its importance, financial planning and objectives, benefits and the stages. To identify the working capital requirement and the basics of investing in securities.
CO2	To understand risk profile of firms, specifically estimate the costs of capital, including debt and equity capital using financial data.
CO3	Apply financial management concepts and tools to the financing decisions, dividend decisions and investment decisions
CO4	To analyze and develop analytical skills this would facilitate the decision making in business situations

COMPUTER FUNDAMENTALS

After completion of course:

CO1	To learn about basics of Computer.
CO2	To learn about basics of hardware components.
CO3	To learn about basics of Operating System software.
CO4	To learn about basics of Application System software.

BBA II YEAR

BUSINESS FINANCE

After completion of course:

CO1	To define business finance, its roles, functions and importance and to introduce risk profile of firms, specifically estimate the costs of capital, including debt and equity capital using financial data.
CO2	Fair and in depth understanding of capital and money market instruments
CO3	Apply knowledge of tools to the financing decisions, dividend decisions and investment decisions to increase the base of financial inclusion.
CO4	To analyze and develop analytical skills this would facilitate the decision making in business situations

STRATEGIC MANAGEMENT

After completion of course:

CO1	Explain the strategy Management process to analyze and improve organizational performance.
CO2	Determine the internal capabilities and external opportunities.
CO3	Compare strategies which are suitable for the business activities.
CO4	Select Implementation plan and evaluation criteria of Control process.

MARKETING MANAGEMENT

After completion of course:

CO1	Understand the principles and practices of marketing, including its nature, scope, importance in a liberalized economy and product life cycle management.
CO2	Gain proficiency in predicting and determining market research to modify strategic decisions, including selecting appropriate distribution channels for products and services.
CO3	Infer the principles of pricing strategy, setting objectives and strategies, conducting break-even analysis, analysing sales forecasts and market segmentation for effective pricing decisions.
CO4	Develop comprehensive skills in designing and comparing effective sales promotion, advertising campaigns, utilizing various sales promotion methods, and selecting public relations tactics to justify organizational visibility and market presence.

HUMAN RESOURCE MANAGEMENT

After completion of course:

CO1	Defining the term Human resource management and understand the concept of managerial effectiveness.
CO2	Describe the conceptual knowledge of HR Planning and selection procedure in an organization.
CO3	Demonstrate various training techniques and its importance to the employees.
CO4	Analyze and evaluate the best suitable performance appraisal technique and leadership style.

QUANTITATIVE TECHNIQUES

After completion of course:

CO1	To enable the students to know the scientific approach to decision-making when solving business problems. Several methods are introduced in applying mathematics to solve management problems quantitatively.
CO2	To determine the most efficient use of limited resources in maximizing some measure of benefits through various models like PERT/CPM etc.
CO3	To identify the most profitable distribution pattern for transporting products from factories to markets, and determining the best way to assign several objects to several other objects are other major problems handled in this course.
CO4	Models are presented for making decisions when the payoff to the decision maker depends on the decision made and an event

MANAGEMENT INFORMATION SYSTEM

After completion of course:

CO1	To describe the role of information technology and information systems in business
CO2	To record the current issues of information technology and relate those issues to the firm
CO3	To have and demonstrate a working knowledge of concepts and terminology related to information technology
CO4	To appraise the knowledge of Microsoft Office

BBA III YEAR

ORGANISATIONAL BEHAVIOUR

After completion of course:

CO1	Understand the concept of organization Behaviour and its role in today's business era.
CO2	Create information about perception and analyse its difference with sensation.
CO3	Defining the term Group dynamics and its relevance in an organization.
CO4	Evaluate the different factors of organizational change and apply different measures to overcome change.

INDIAN MANAGEMENT THOUGHTS & BUSINESS LEADERS

After completion of course:

CO1	To gain knowledge and understanding of the principles and practices of Value Management.
CO2	To understand the principles of moral decision-making in global business
CO3	To identify the trade-offs that face an ethical manager
CO4	To gain insights and managerial contribution of business leaders.

INTERNATIONAL BUSINESS

After completion of course:

CO1	Defining the term International Business and understand the concept of domestic and international business.
CO2	Explain the basics of various business environments.
CO3	Apply knowledge of International business practices to solve business problems at global level.
CO4	Ability to develop managerial strategies by identifying potential global opportunities in business world.

COST & MANAGEMENT ACCOUNTING

After completion of course:

CO1	To understand the concept and role of cost accounting in the business management of manufacturing and non-manufacturing companies.
CO2	To be able to express the place and role of cost accounting in the modern economic environment.
CO3	To enumerate the selection of the costs according to their impact on business
CO4	To differentiate methods of schedule costs per unit of production.

E-COMMERCE

After completion of course:

CO1	Understand the basic concepts and technologies used in the field of E-Commerce.
CO2	Understand the knowledge of Business Strategy.
CO3	Understand the processes of developing and implementing information systems .
CO4	Understand the concepts of E-Markets, Electronic Data Interchange and E-Business.

BOOK-REVIEW PRESENTATION

After completion of course:

CO1	To expose students to the 'real' working environment and get acquainted with the organization structure, business operations and administrative Functions.
CO2	To have hands-on experience in the students' related field so that they can relate and reinforce what has been taught at the university.
CO3	To promote cooperation and to develop synergetic collaboration between industry and the university in promoting a knowledgeable society.
CO4	To set the stage for future recruitment by potential employers.

A Co-educational English Medium PG College

Program Outcomes (POs)

- After the successful of BCA Program the student will be able to -

Program Outcomes	Description
PO1	Discipline knowledge: Acquiring knowledge on basics of Computer Science and ability to apply to design principles in the development of solutions for problems of varying complexity.
PO2	Problem Solving: Improved reasoning with strong mathematical ability to Identify, formulate and analyze problems related to computer science and exhibiting a sound knowledge on data structures and algorithms.
PO3	Difficulty Analysis: Talent to classify, significantly evaluate and prepare complex computing problems using fundamentals of computer knowledge and request domains.
PO4	Design and Development of Solutions: Ability to design and development of algorithmic solutions to real/world problems and acquiring a minimum knowledge on statistics and optimization problems. Establishing excellent skills in applying various design strategies for solving complex problems.
PO5	Accomplish Investigations of Compound Computing Troubles: Ability to invent and ways experiments interpret data and present well up to date conclusions.
PO-6	Application Systems Knowledge: Possessing a sound knowledge on computer application software and ability to design and develop app for applicative problems.
PO-7	Modern Tool Usage: Identify, select and use a modern scientific and IT tool or technique for modeling, prediction, data analysis and solving problems in the area of Computer Science and making them mobile based application software.
PO-8	Mission Administration: Skill to recognize administration and Computing philosophy with computing acquaintance to supervise projects in multidisciplinary environments.
PO-9	Communication: Must have a reasonably good communication knowledge both in oral and writing.
PO-10	Ethics on Professional, Environment and Society: Exhibiting professional ethics to maintain the integrality in a working environment and also have concern on societal impacts due to computer-based solutions for problems.
PO-11	Motivation to take up Higher Studies: Inspiration to continue education towards advanced studies on Computer Science.

BCA I YEAR

ELEMENTARY PHYSICS

After completion of course:

CO1	Demonstrate conceptual understanding of fundamental physics principles
CO2	Communicate physics reasoning in oral and in written form
CO3	Solve physics problems using qualitative and quantitative reasoning including sophisticated mathematical techniques
CO4	Conduct independent research or work successfully in a technical position.

BASIC MATHEMATICS

After completion of course:

CO1	To impart the required knowledge of Mathematics and statistics for managerial activities among students
CO2	To inculcate in students the fundamental mathematical background in computer science.
CO3	To gain knowledge about Sets, Relations Functions, Matrices, Mathematical logic, and Group theory.
CO4	Understand the basic concepts of Sets, Relations Functions, Matrices, Mathematical logic, and Group theory

PRINCIPLES OF PROGRAMMING LANGUAGE

After completion of course:

CO1	Explain basic concepts of programming language, flowchart and design an algorithm for a given problem.
CO2	Select the loops and decision making statements to solve the problem.
CO3	Describe C programs that use Pointers to access arrays, strings and functions.
CO4	Implement user defined data types including structures and unions to solve problems, file handling.

COMPUTER ORGANISATION

After completion of course:

CO1	Summarize the fundamental components of basic computer system and its organization.
CO2	Apply arithmetic and logical micro operations of binary number system.
CO3	Analyze control unit design and concept of pipelining.
CO4	Classify memory hierarchy and examine numerical problem based on it.

OFFICE MANAGEMENT TOOLS

After completion of course:

CO1	To perform documentation such as basic editing functions, formatting text, copy and moving objects and text. Learning the formatting skills on paragraphs, tables, lists, and pages.
CO2	To perform accounting operations such as Learning formulas, creating charts and graphs that can easily explain or simplify complex information or data. Analyzing data using Pivot Tables and Pivot Charts.
CO3	To perform presentation skills.
CO4	Create slide presentations that include text, graphics, animation, and transitions.

TECHNICAL WRITING & COMMUNICATION SKILLS

After completion of course:

CO1	Develop a solid understanding of English grammar rules and correct usage, including sentence structure, punctuation, and syntax.
CO2	Build a broad vocabulary to enhance reading comprehension and expressive writing.
CO3	Write clear, coherent, and well-organized essays, reports, and other written forms, with a focus on thesis development, argument support, and coherent structure
CO4	Enhance the ability to revise and edit writing for clarity, coherence, and correctness, including grammar, punctuation, and style

C- LABORATORY

After completion of course:

CO1	To write programs to understand selection and iterative statements.
CO2	To write programs to implement usage of 1D and 2D arrays.
CO3	To develop code reusable programs using user defined functions.
CO4	To write programs to solve memory access problems using pointers.

OFFICE AUTOMATION LABORATORY

After completion of course:

CO1	Students will have a working knowledge of paragraph formatting, macro and mail-merge in MS-Word.
CO2	Students will have a working knowledge of basic functions and formulas in MS-Excel.
CO3	Create presentation by adding slides, applying animations, set times to slides, linking to other files.
CO4	Students will have a working knowledge of basic functions and formulas in MS-Powerpoint.

TYPING SKILLS LABORATORY

After completion of course:

CO1	Develop a solid understanding of English grammar rules and correct usage, including sentence structure, punctuation, and syntax.
CO2	Build a broad vocabulary to enhance reading comprehension and expressive writing.
CO3	Write clear, coherent, and well-organized essays, reports, and other written forms, with a focus on thesis development, argument support, and coherent structure
CO4	Enhance the ability to revise and edit writing for clarity, coherence, and correctness, including grammar, punctuation, and style

BCA II YEAR

BUSINESS ACCOUNTING

After completion of course:

CO1	To define financial management, its importance, financial planning and objectives, benefits and the stages. To identify the working capital requirement and the basics of investing in securities.
CO2	To understand risk profile of firms, specifically estimate the costs of capital, including debt and equity capital using financial data.
CO3	Apply financial management concepts and tools to the financing decisions, dividend decisions and investment decisions
CO4	To analyze and develop analytical skills this would facilitate the decision making in business situations

DISCRETE MATHEMATICS

After completion of course:

CO1	To understand the basics concepts of Discrete Mathematical Structures.
CO2	To get the Knowledge about sets, relations and functions.
CO3	To study the basics of lattices and graphs.
CO4	To get familiar with propositional logic

OPERATING SYSTEM

After completion of course:

CO1	Describe the basics of the operating systems, mechanisms of OS to handle processes, threads, and their communication.
CO2	Analyze the memory management and its allocation policies.
CO3	Illustrate different conditions for deadlock and their possible solutions.
CO4	Discuss the storage management policies with respect to different storage management technologies

DATABASE MANAGEMENT SYSTEM

After completion of course:

CO1	Identify the fundamental elements of relational database management systems.
CO2	Design and explain the basic concepts of relational data model, entity-relationship model, and relational database design.
CO3	Apply the relational database theory to formulate basic and advanced SQL queries and relational algebra expressions for the queries.
CO4	Identify the use of normalization and functional dependency in database design and understand the concept of transactions in database management system.

WEB DESIGNING & MULTIMEDIA

After completion of course:

CO1	Describe basics knowledge of the Internet contrast protocols, Security and Privacy issues.
CO2	Explain basic concepts of creation of web application considering HTML, CSS and JavaScript.
CO3	Compare the decision making statement logic under different concepts.
CO4	Design web applications using HTML, JavaScript, and CSS.

OBJECT ORIENTED PROGRAMMING C++

After completion of course:

CO1	Explain OOP's features and C++ concepts.
CO2	Construct class and object using constructors.
CO3	OOP's concepts like inheritance, Interface & package in real time situations.
CO4	Execute string functions and handling data files and operations on files.

DATABASE LABORATORY

After completion of course:

CO1	Design an information model expressed in the form of ER diagram.
CO2	Apply SQL queries to implement and manipulate the database and provide different constraints.
CO3	Apply structured query language to automate the real time problems of databases.
CO4	Apply structured query language to join more than one tables.

OBJECT ORIENTED LABORATORY

After completion of course:

CO1	Understand basic Structure of the C ++ PROGRAMMING, declaration and usage of variables
CO2	Understand C++ programs using Class and operators Exercise conditional and iterative statements to Write C++ programs
CO3	Understand for C++ programs using Pointers to access arrays, strings and functions
CO4	Understand C++ programs using pointers and allocate memory using dynamic memory management functions.

WEB DESIGNING LABORATORY

After completion of course:

CO1	Understand and apply fundamental internet concepts and protocols.
CO2	Design and develop web pages using HTML
CO3	Implement and customize web layouts using Cascading Style Sheets (CSS).
CO4	Install and use Content Management Systems (CMS) like Joomla and WordPress.

MULTIMEDIA LABORATORY

After completion of course:

CO1	Describe basics knowledge of the Internet contrast protocols, Security and Privacy issues.
CO2	Explain basic concepts of creation of web application considering HTML, CSS and JavaScript.
CO3	Compare the decision making statement logic under different concepts.
CO4	Design web applications using HTML, JavaScript, and CSS.

BCA III YEAR

DATA STRUCTURE

After completion of course:

CO1	Recall information for writing Algorithms in solving problems.
CO2	Choose appropriate data structure as applied to specify problem definition.
CO3	Apply problem solving skills & provide a foundation for advanced programming courses using an object-oriented programming methodology.
CO4	Use linear & Non linear Data structures like stacks, Queues, Linked list etc., and show operations like searching, insertion, deletion, traversing mechanism etc. on various data structures

SYSTEM DESIGN CONCEPT

After completion of course:

CO1	Explain the concept of system and system development life cycle (SDLC), system testing, software project planning.
CO2	Describe systems design and system design techniques, Management Information System.
CO3	Outline and translate a specification into a design, and then realize that design practically, using an appropriate system design methodology.
CO4	Develop the system from the design and effectively apply relevant standards and perform testing, and quality management and practice.

NETWORKING TECHNOLOGIES

After completion of course:

CO1	Understand the fundamentals of computer networking and its various components
CO2	Identify and analyze various OSI Layers and their functions.
CO3	Understand the importance of network security , protocols and implement basic security measures.
CO4	Explore Switching Techniques in Networking

CORE JAVA PROGRAMMING

After completion of course:

CO1	Define the concept of OOP's as well as the purpose and usage principles of inheritance, polymorphism, encapsulation and method overloading
CO2	Explain Control Statements, Arrays, classes, objects, members of a class and the relationships among them needed for a specific problem
CO3	OOP's concepts like inheritance, Interface & package in real time situations
CO4	Develop Java application programs using sound OOP practices (e.g., interfaces) and proper program structuring (e.g., by using access applet, multithreading).

E-COMMERCE

After completion of course:

CO1	Define and Describe E-business and its Models.
CO2	Discuss various Testing strategies and their Implementation.
CO3	Understanding various Electronic Payment methods.
CO4	Understanding E-banking mechanism. & Mobile Commerce.

PHP

After completion of course:

CO1	Understanding client side & server side scripting
CO2	Utilizing the basic concept of statements and arrays.
CO3	Understanding Regular expression & Functions
CO4	Implement browser handling power of PHP & Exceptions & Data base Handling

NETWORKING LABORATORY

After completion of course:

CO1	Understand and implement basic network architectures.
CO2	Analyze and apply the OSI model for network communication.
CO3	Implement and differentiate between TCP/IP and OSI models.
CO4	Understand and implement various switching techniques in networking.

CORE JAVA LABORATORY

After completion of course:

CO1	Able to solve real world problems using OOP techniques.
CO2	Able to understand the use of abstract classes.
CO3	Able to solve problems using java collection framework and I/o classes.
CO4	Able to develop multithreaded applications with synchronization.

PHP LABORATORY

After completion of course:

CO1	To understand the features like functions, forms in PHP.
CO2	To introduce the importance of PHP in web page design
CO3	To handle requests and draw images on the server with AJAX.
CO4	To understand Files, OOPs concepts , Cookies, Sessions and Data base.

Programme Outcomes (POs)

PO Number	Upon completion of B.Com Degree Programme the graduates will be able to
PO-1	Graduate will acquire knowledge in the field of social sciences, literature and humanities which make them sensitive and sensible enough.
PO-2	The graduates will be acquainted with the social, economical, historical, geographical, political, ideological and Psychological thinking.
PO-3	The program also empowers the graduates to appear for various competitive examinations or choose the post graduate programme of their choice
PO-4	The B. A. program enables the students to acquire the knowledge with human values framing the base to deal with various problems in life with courage with humanity.
PO-5	A graduate will be ignited enough to think and act over for the solution of various issues prevailed in the human life to make this world better than ever.
PO-6	The B.A. program enables the students to acquire knowledge with human values, framing the base to deal with various problems in life with courage and humanity.
PO-7	A graduate student in arts/social sciences/humanities shall be confident to speak, write, read, listen and understand the English language and one or more Indian languages.
PO-8	Develop critical and analytical skills to the identification and resolution of problems within complex changing social, linguistic and literary contexts
PO-9	Graduate will Get acquainted with the historical events happened in India as well as in the world.
PO-10	Graduate will Become a responsible and dutiful citizen

BA I YEAR

GEOGRAPHY -I

After completion of course:

CO1	Identify the concepts of Origin of Earth and land forms
CO2	Illustrate the different forces acting over the Earth.
CO3	Compare and analyze the different cycles of landform erosion and their processes...
CO4	Knowledge of physical and environmental geography, and the ability to relate them to human activities.

GEOGRAPHY -II

After completion of course:

CO1	Knowledge of physical and environmental geography, and the ability to relate them to human activities.
CO2	Classify the different tribes of the world and use various factors to interpret the spatial distribution of population.
CO3	Visualize the various patterns of migration, settlements and summarize the major problems of urbanization in World.
CO4	Analyze the role of human agency in shaping the environment and responding to environmental challenges.

ENGLISH LITERATURE -I

After completion of course:

CO1	Ability to interpret and analyze poetic texts, understanding their themes, symbols, and use of language
CO2	Develop critical thinking skills by exploring different critical perspectives and theoretical approaches to poetry
CO3	Understand the historical and cultural context in which different poems were written and how these contexts influence their content and form.
CO4	Familiarity with various poetic forms and genres, such as sonnets, haikus, free verse, etc.

ENGLISH LITERATURE -II

After completion of course:

CO1	Interpretation and appreciation of selected texts from the genres of prose and fiction.
CO2	Strengthening skills of note making, summarizing and dialogue writing.
CO3	Understanding texts with specific reference to genres, forms and literary terms
CO4	To introduce essay as a genre of literature and acquaint with important essayists and their style of writing

PSYCHOLOGY –I

After completion of course:

CO1	Explain the concept of epistemology of psychology, analyze and appreciate psychology as a science and its biological basis.
CO2	Apply the principles of major concepts of psychology, such as sensation and perception, and critically Analyze the understanding of the relationship between stimulus and response base for behavior .
