## 2. About the Course

**Course Name: Advanced Web Programming(VAC-104-CA)**

**Course Summary:** Web Programming course will introduce students to the realm of web design. The first and necessary step for that goal is to understand how HTML works, and then more advanced and complicated structures and concepts of web design, such as CSS and layout control. A series of tasks (website evaluation, website development, reflective report, collaborative website development, website self-assessment), as well as several group activities (discussions, online resource sharing, collaborative work) will help to gain practical experience on web development and a thorough understanding of web design issues.

### **Enrollment Criteria:**

1. Participants must be interested.
2. Must provide the NOC if from other department.

### **Course Outcomes:**

1. Students will be able to know how to design a website. How does a website work? How to create and design banners, advertisements, etc. Learning about the tools and techniques of web design covers using software applications.
2. Students will be able to understand how HTML elaborates the general structure of a web page design as well as tags and the concept of HTML files.
3. Students will be able to understand Java Script and Boot Strap logic-based language in programming and interactive websites with cool tabs, sliders, calls to action and other dynamic features.
4. Students will be able to understand graphic designing to create cool graphics for a website. For grasping the concept of graphic design there are a number of software's.

## Unit I

**Introduction to Data Science: Overview of Data Science:** Definitions, importance, and applications., **Data Science Lifecycle:** Data collection, cleaning, exploration, modeling, and deployment.,

**Tools and Technologies:** Introduction to Python, R, and essential libraries (Pandas, NumPy, Scikit-learn).

## Unit II

**Data Exploration and Preparation: Data Cleaning:** Handling missing values, outliers, and data inconsistencies., **Data Transformation:** Normalization, encoding categorical variables, and feature scaling.,

**Exploratory Data Analysis (EDA):** Visualization techniques using Matplotlib, Seaborn, and Plotly.

## Unit III

**Statistical Analysis and Probability: Descriptive Statistics:** Measures of central tendency and dispersion., **Inferential Statistics:** Hypothesis testing, confidence intervals, and p-values.,

**Probability Theory:** Distributions, Bayes' theorem, and probabilistic models.

## Unit IV

**Machine Learning and Predictive Modeling: Supervised Learning:** Regression (linear, polynomial), classification (logistic, decision trees), **Unsupervised Learning:** Clustering (K-means, hierarchical), dimensionality reduction (PCA).,

**Model Evaluation:** Cross-validation, ROC curves, confusion matrices.

## Unit V

**Advanced Machine Learning Techniques: Ensemble Methods:** Bagging, boosting (e.g., XGBoost), and stacking, **Deep Learning:** Basics of neural networks, convolutional neural networks (CNNs), and recurrent neural networks (RNNs)

**Natural Language Processing (NLP):** Text preprocessing, sentiment analysis, and topic modeling.

**Date: 29/01/2022**

It is notified for all the students that the Department is going to organize Add-on Course on(VAC-204-CA)“**Data Science and Analytical**”for UG/PG studentsfor their benefits in the near future. The course will be started from 2/02/2022. The duration of the course will be of 35 hours which will be covered in 6 weeks.

Interested bonafide students are advised to register themselves. Certificate will be awarded on the completion of the course.

Note:

1. The course is free of cost.
2. Minimum 70% attendance is mandatory.
3. The successful candidates will be issued certificates by the college.

## 2. About the Course

**Course Name: Data Science and Analytical(VAC-204-CA)**

**Course Summary:** Data Science and Analytical course provides an in-depth understanding of data science, combining core concepts with advanced techniques and industry applications. The aim is to equip students with the skills needed to solve complex data problems and add significant value in real-world scenarios.

### **Enrollment Criteria:**

1. Participants must be interested.
2. Must provide the NOC if from other department.

### **Course Outcomes:**

After the completion the Course Students will be able

1. To efficiently gather, clean, and preprocess data from various sources. They will demonstrate competence in performing exploratory data analysis (EDA) to uncover insights and trends.
2. Students will be adept at implementing and evaluating machine learning models for classification, regression, and clustering tasks. They will apply appropriate algorithms to solve real-world problems and interpret model results.
3. Students will be capable of effectively communicating data findings and insights through visualizations and presentations. They will create compelling narratives to convey complex data analyses to both technical and non-technical audiences.
4. Students will demonstrate the ability to lead and execute a complete data science project, from problem definition through data collection, analysis, and model

## 2. About the Course

**Course Name: “Mobile App Development Kotlin”(VAC-304-CA)**

**Course Summary:** Mobile app development Kotlin involves creating Android applications using the Kotlin programming language, known for its modern syntax and interoperability with Java. Kotlin simplifies coding with concise, expressive syntax and powerful features such as null safety and coroutines for asynchronous operations. Developers use Android Studio as their primary IDE, leveraging tools like XML for UI design, Gradle for build management, and libraries such as Retrofit for network operations. Kotlin's robust features streamline app development, enhance performance, and improve code maintainability, making it a preferred choice for building responsive, high-quality Android apps.

### **Enrollment Criteria:**

1. Participants must be interested.
2. Must provide the NOC if from other department.

### **Course Outcomes:**

By the end of the course, students should be able to:

1. Develop Mobile Apps Using Kotlin
2. Understand Android Architecture
3. Design User Interfaces
4. Manage Data Storage
5. Integrate Networking Capabilities
