About the Course

**Course Name: “Certificate Course in Cloud Computing on Amazon Web Services”
(VAC-306-CA)**

Course Summary: Amazon Web Services (AWS) offers a comprehensive cloud computing platform that provides scalable and flexible resources over the internet. AWS enables businesses to deploy, manage, and scale applications with ease, utilizing a range of services including computing power, storage, and databases. Key features include pay-as-you-go pricing, global data center infrastructure, and a broad selection of tools for analytics, machine learning, and Internet of Things (IoT). AWS’s reliability and security make it a popular choice for enterprises of all sizes, allowing them to innovate rapidly while optimizing costs and resources.

Enrollment Criteria:

1. Participants must be interested.
2. Must provide the NOC if from other department.

Course Outcomes:

Upon completion of the course, the student will be able to

1. Understanding AWS Fundamentals
2. Proficiency in AWS Core Services
3. Cloud Architecture and Best Practices
4. Security and Compliance

Data Science Lifecycle: Data collection, cleaning, exploration, modeling, and deployment.,
Tools and Technologies: Introduction to Python, R, and essential libraries (Pandas, NumPy, Scikit-learn).

Unit II

Data Exploration and Preparation: Data Cleaning: Handling missing values, outliers, and data inconsistencies., **Data Transformation:** Normalization, encoding categorical variables, and feature scaling.,
Exploratory Data Analysis (EDA): Visualization techniques using Matplotlib, Seaborn, and Plotly.

Unit III

Statistical Analysis and Probability: Descriptive Statistics: Measures of central tendency and dispersion., **Inferential Statistics:** Hypothesis testing, confidence intervals, and p-values.,
Probability Theory: Distributions, Bayes' theorem, and probabilistic models.

Unit IV

Machine Learning and Predictive Modeling: Supervised Learning: Regression (linear, polynomial), classification (logistic, decision trees), **Unsupervised Learning:** Clustering (K-means, hierarchical), dimensionality reduction (PCA),
Model Evaluation: Cross-validation, ROC curves, confusion matrices.

Unit V

Advanced Machine Learning Techniques: Ensemble Methods: Bagging, boosting (e.g., XGBoost), and stacking, **Deep Learning:** Basics of neural networks, convolutional neural networks (CNNs), and recurrent neural networks (RNNs)
Natural Language Processing (NLP): Text preprocessing, sentiment analysis, and topic modeling.

Notice

Date: 1/01/2024

It is notified for all the students that the Department of Computer Science is going to organize Value Added Course on (VAC-206-CA) “**Data Science**” for UG/PG students for their benefits in the near future. The course will be started from 5/01/2024. The duration of the course will be of 40 hours which will be covered in 6 weeks.

Interested bonafide students are advised to register themselves. Certificate will be awarded on the completion of the course.

Note:

1. The course is free of cost.
2. Minimum 70% attendance is mandatory.
3. The successful candidates will be issued certificates by the college.

About the Course

Course Name: “Data Science” (VAC-206-CA)

Course Summary: Data Science course provides an in-depth understanding of data science, combining core concepts with advanced techniques and industry applications. The aim is to equip students with the skills needed to solve complex data problems and add significant value in real-world scenarios.

Enrollment Criteria:

1. Participants must be interested.
2. Must provide the NOC if from other department.

Course Outcomes:

After completion the course, Students will be able

1. To efficiently gather, clean, and preprocess data from various sources. They will demonstrate competence in performing exploratory data analysis (EDA) to uncover insights and trends.
2. Students will be adept at implementing and evaluating machine learning models for classification, regression, and clustering tasks. They will apply appropriate algorithms to solve real-world problems and interpret model results.
3. Students will be capable of effectively communicating data findings and insights through visualizations and presentations. They will create compelling narratives to convey complex data analyses to both technical and non-technical audiences.
4. Students will demonstrate the ability to lead and execute a complete data science project, from problem definition through data collection, analysis, and model deployment.
5. Students will showcase their ability to work on industry-relevant problems and deliver actionable solutions.

Course Outcomes & Program Outcomes Mapping:

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1	PO1 2	PSO 1	PSO 2	PSO 3

CO3										3					3
CO4										3			3		
CO5		3			3		3								
Target		3			3		3	3		3			3		3

Certification Criteria: Minimum 50% marks in Certification Exam and 70% attendance

Course Prerequisite:

1. Basic knowledge of Computer and Internet.
2. Idea of using office automation system applications.

Course Duration: 35 Hours

Syllabus

Unit I

Introduction to Data Science: Overview of Data Science: Definitions, importance, and applications.,
Data Science Lifecycle: Data collection, cleaning, exploration, modeling, and deployment.,
Tools and Technologies: Introduction to Python, R, and essential libraries (Pandas, NumPy, Scikit-learn).

Unit II

Data Exploration and Preparation: Data Cleaning: Handling missing values, outliers, and data inconsistencies., **Data Transformation:** Normalization, encoding categorical variables, and feature scaling.,
Exploratory Data Analysis (EDA): Visualization techniques using Matplotlib, Seaborn, and Plotly.

Unit III

Statistical Analysis and Probability: Descriptive Statistics: Measures of central tendency and dispersion., **Inferential Statistics:** Hypothesis testing, confidence intervals, and p-values.,
Probability Theory: Distributions, Bayes' theorem, and probabilistic models.

Unit IV

Machine Learning and Predictive Modeling: Supervised Learning: Regression (linear, polynomial), classification (logistic, decision trees), **Unsupervised Learning:** Clustering (K-means, hierarchical), dimensionality reduction (PCA),
Model Evaluation: Cross-validation, ROC curves, confusion matrices.

Unit V

Advanced Machine Learning Techniques: Ensemble Methods: Bagging, boosting (e.g., XGBoost), and stacking, **Deep Learning:** Basics of neural networks, convolutional neural networks (CNNs), and recurrent neural networks (RNNs)
Natural Language Processing (NLP): Text preprocessing, sentiment analysis, and topic modeling.

Notice

Date: 28/03/2024

It is notified for all the students that the Department of Computer Science is going to organize Value Added Course on (VAC-206-CA) **“Data Science”** for UG/PG students for their benefits in the near future. The course will be started from 01/04/2024. The duration of the course will be of 40 hours which will be covered in 6 weeks.

Interested bonafide students are advised to register themselves. Certificate will be awarded on the completion of the course.

Note:

1. The course is free of cost.
2. Minimum 70% attendance is mandatory.
3. The successful candidates will be issued certificates by the college.

About the Course

Course Name: “Data Science” (VAC-206-CA)

Course Summary: Data Science course provides an in-depth understanding of data science, combining core concepts with advanced techniques and industry applications. The aim is to equip students with the skills needed to solve complex data problems and add significant value in real-world scenarios.

Enrollment Criteria:

1. Participants must be interested.
2. Must provide the NOC if from other department.

Course Outcomes:

After completion the course, Students will be able

1. To efficiently gather, clean, and preprocess data from various sources. They will demonstrate competence in performing exploratory data analysis (EDA) to uncover insights and trends.
2. Students will be adept at implementing and evaluating machine learning models for classification, regression, and clustering tasks. They will apply appropriate algorithms to solve real-world problems and interpret model results.
3. Students will be capable of effectively communicating data findings and insights through visualizations and presentations. They will create compelling narratives to convey complex data analyses to both technical and non-technical audiences.
4. Students will demonstrate the ability to lead and execute a complete data science project, from problem definition through data collection, analysis, and model deployment.
5. Students will showcase their ability to work on industry-relevant problems and deliver actionable solutions.

Course Outcomes & Program Outcomes Mapping:

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1	PO1 2	PSO 1	PSO 2	PSO 3

CO3										3					3
CO4										3			3		
CO5			3				3								
Target			3				3	3		3			3		3

Certification Criteria: Minimum 50% marks in Certification Exam and 70% attendance

Course Prerequisite:

1. Basic knowledge of Computer and Internet.
2. Idea of using office automation system applications.

Course Duration: 40 Hours
