7.1.2

1. Alternate sources of energy and energy conservation measures

Here are some alternative energy sources and energy-saving techniques that Shri Mahaveer College consider to support sustainable energy practices.

The following are some of the resources and programs the college has put in place:

- 1. Solar Power:** Shri Mahaveer College has installed solar power panels on the roof of its building. Solar panel has the capacity of 44.64 kWp. The power generated by this panel is injected to the grid and the rebate on the electricity bill is availed each month accordingly. Biills of Solar Panels & Pics to be attached here
- 2. Transportation Initiatives:** Shri Mahaveer College encourages environmental friendly modes of transportation by mandating the use of bicycles and e-vehicles for two days. Additionally, the college can further support its sustainability efforts by implementing various transportation initiatives. These include establishing a bike-sharing program to make bicycles easily accessible. A carpooling system and shuttle services from nearby public transport hubs can reduce the number of vehicles on campus.
- 3. Energy Audits:** Shri Mahaveer College regularly conducts energy audits to identify areas where energy use can be reduced. Using the data from these audits, the college optimizes energy usage and implements various energy conservation measures. This proactive approach helps the college to minimize its carbon footprint, enhance sustainability, and reduce operational costs by ensuring that energy resources are used efficiently.

4. **LED Lights:** Shri Mahaveer College is committed to reducing energy consumption by using CFL, LED, and star-rated power equipment. These devices consume less electricity, resulting in reduced energy utilization. The college ensures that all electrical equipment procured has an energy star rating as per the Bureau of Energy Efficiency (BEE) standards, which guarantees lower electricity consumption. The college has installed LED lighting throughout the entire campus, replacing older lighting systems to ensure low energy consumption.
5. **Energy Audits:** Shri Mahaveer College regularly conducts energy audits to identify areas where energy consumption can be reduced. Using the data obtained from these audits, the college optimizes energy usage and implements energy conservation measures to enhance efficiency and reduce overall energy consumption.

2. Management of the Various Types of Degradable and Non- Degradable Waste

Shri Mahaveer College is deeply committed to protecting the environment, health, and well-being through effective waste management practices such as segregation, recycling, and composting. The college promotes awareness about generating less waste among students, staff, and faculty members. The housekeeping staff, gardeners, and sweepers play a crucial role in the segregation of waste, ensuring that waste management practices are effectively implemented throughout the campus.

To deal with the issue of degradable waste generated on campus, Shri Mahaveer College has installed compost pits to break down organic waste materials such as leftover food and garden waste. The compost produced is used as organic fertilizer for the gardens and green areas on campus. This initiative has helped maintain the campus's greenery while also reducing the amount of waste sent to landfills.

Students are encouraged to use waste paper and newspapers in creative activities such as Wall Magazine and Waste to Best. Tree waste, including dried leaves and plant clippings, is collected and composted, with the resulting compost used in organic farming. Dustbins are strategically placed throughout the campus for effective waste segregation.

The college is committed to reducing paper-based waste through digitization of office procedures using Whats App, email, and other electronic means. This not only reduces paper waste but also cuts down on carbon dioxide emissions. Single-sided paper use is encouraged for drafts, meeting minutes, and notes, promoting an environmentally friendly approach to waste management.

3. Water Conservation

Water conservation involves the effective protection, regulation, and management of water resources. At Shri Mahaveer College, reusable water systems and water conservation practices are implemented to save energy and ensure the prudent use and maintenance of the water supply. This includes managing both the quantity and quality of water used.

Water resources management (WRM) at the college encompasses the planning, development, and administration of water resources, addressing both water quantity and quality for all applications. These practices ensure sustainable water use and contribute to the college's overall environmental conservation efforts.

Rain water harvesting system: Runoff generated on the campus is collected using a check dam constructed on a natural drain passing through the campus. The stored water percolates into the ground to recharge groundwater. Rainwater from rooftops and surface runoff within the campus are collected in five percolation pits, each measuring 3m x 3m, strategically located at feasible points to further enhance groundwater recharge.

4. Green Campus Initiatives

Shri Mahaveer College is committed to demonstrating finely tuned sensitivity and responsibility in implementing green concepts on campus. Our campus sustainability initiatives aim to promote green practices within and beyond the institution, developing best practices strategies in environmental management. While the establishment and maintenance of a green campus are crucial, spreading awareness about green practices among students and educating stakeholders is our priority.

The policy begins with information and concludes with a plan of action. Shri Mahaveer College will responsibly manage water resources, implement effective waste management, conserve natural resources, and advocate for minimal paper use. The college will adopt the following practices to establish and maintain a green campus while extending awareness and green initiatives beyond the campus. This will create a safer environment that is a better place to live, learn, and play.

- a) **Water Resource Management:** Efficient use and conservation of water resources through reusable systems and water conservation techniques.
- b) **Waste Management:** Effective segregation, recycling, and composting of waste to reduce landfill contributions.
- c) **Energy Conservation:** Utilization of energy-efficient devices and renewable energy sources to minimize energy consumption.
- d) **Paperless Communication:** Promoting digital communication and minimizing paper use through electronic means.
- e) **Green Awareness:** Educating students and staff on sustainable practices and involving them in green initiatives.
- f) **Tobacco Free campus:** According to institute policy and rules the use of tobacco products is treated as offence.

These practices ensure a holistic approach to environmental sustainability, fostering a green campus culture at Shri Mahaveer College.

5. Disabled-friendly, barrier free environment

Shri Mahaveer College provides a barrier-free environment where students and staff with disabilities can move about safely and freely, using all facilities within the built environment. This environment supports the independent functioning of individuals, enabling them to participate in everyday activities on campus without assistance. Buildings and places are made barrier-free.

RAMP: Ramps with handrails, inclined planes built in addition to staircases, are provided. These ramps are carefully designed according to specifications to be used by differently-abled individuals.

LIFT: College buildings are equipped with lifts to ensure barrier-free access for students, staff, visitors, and differently-abled individuals. The lift facility is available in the main building.

Divyangjan-friendly Washrooms: College buildings are equipped with Divyangjan-friendly washrooms, ensuring barrier-free access for students, staff, and visitors with disabilities.
