MANAGEMENT OF THE VARIOUS TYPES OF DEGRADABLE AND NON-DEGRADABLE WASTE

Shri Mahaveer College is deeply committed to protecting the environment, health, and well-being through effective waste management practices such as segregation, recycling, and composting. The college promotes awareness about generating less waste among students, staff, and faculty members. The housekeeping staff, gardeners, and sweepers play a crucial role in the segregation of waste, ensuring that waste management practices are effectively implemented throughout the campus.

To deal with the issue of degradable waste generated on campus, Shri Mahaveer College has installed compost pits to break down organic waste materials such as leftover food and garden waste. The compost produced is used as organic fertilizer for the gardens and green areas on campus. This initiative has helped maintain the campus's greenery while also reducing the amount of waste sent to landfills.

Students are encouraged to use waste paper and newspapers in creative activities such as Wall Magazine and Waste to Best. Tree waste, including dried leaves and plant clippings, is collected and composted, with the resulting compost used in organic farming. Dustbins are strategically placed throughout the campus for effective waste segregation.

The college is committed to reducing paper-based waste through digitization of office procedures using WhatsApp, email, and other electronic means. This not only reduces paper waste but also cuts down on carbon dioxide emissions. Single-sided paper use is encouraged for drafts, meeting minutes, and notes, promoting an environmentally friendly approach to waste management.
